

# Shared workspaces for your forms and data

Jotform Teams enables Enterprise users to create shared workspaces to organize and collaborate on team assets. Share forms, tables, reports, documents, and apps using role-based access controls for enhanced security and flexibility. Activity monitoring keeps teams updated on changes to shared resources and the addition or removal of members.

## Enable Collaboration

Use permission settings to allow users to browse teams and related workspaces across the organization. Users can request to join teams with a click.

## Improve Communication

Create teams for departments, clients, or third-party vendors and invite others to join you. Share forms, tables, and more to enhance communication and collaboration.

## Support Dynamic Teams

Team admins can add and remove team members, adjust access levels, reassign forms, and monitor team activity by date, user, and activity type.

## Celebrate Team Goals & Culture

Teams can customize their workspace with a custom background, avatar, and image that reflect their shared values and goals.

## Tailor Data Access

Control who can view and edit forms and data with role-based access. Roles include team admin, form creator, data collaborator, and data viewer.

## Reduce Redundancies

Shared resources reduce version control issues and speed collaboration. Work on forms simultaneously and see real-time updates with team activity monitoring.
